age: 33

Education

- 2007 Postdoctorate. Department of Geography, San Diego State University, United States. (<http://geography.sdsu.edu>)
- 2004 Ph.D. Management, University of Barcelona, Barcelona, Spain.
Dissertation: Design of homogeneous territorial units: A Methodological Proposal and Applications (*Cum Laude*).
Department of Econometrics, Statistics and Spanish Economy.
- 2000 MSc. Management and Economics, Pompeu Fabra University, Barcelona, Spain.
- 1998 B.A. Business Administration, National University of Colombia, Colombia.
-

Academic Appointments

- 2007- Full-time Professor, Department of Economics, EAFIT University, Medellin, Colombia.
- 2005-07 Postdoctoral researcher. Department of Geography, San Diego State University, United States. (<http://geography.sdsu.edu>)
- 2004 Research Scholar. Department of Geography. University of California at Santa Barbara, United States. (<http://www.geog.ucsb.edu>)
-

Professional Appointments

- 1997-99 Director of Production Planning. Super de Alimentos. S.A. Manizales, Colombia.
-

Experience in Research Institutions

- 2007- Director, Research in Spatial Economics (RISE-group), Department of Economics, EAFIT University, Colombia. (<http://rise-group.org>).
- 2005-07 Member, Regional Analysis Laboratory (REGAL), Department of Geography, San Diego State University, United States. (<http://regionalanalysislab.org>).
- 2004- Member, Geographic Systems Analysis Lab (GSAL), Department of Geography, University of California, Santa Barbara. United States. (<http://www.geog.ucsb.edu/~forest/RLC/Visitors.html>).

2000- Member, AQR Research Group (Regional Quantitative Analysis). Department of Econometrics, Statistics and Spanish Economy. University of Barcelona. And research unit in the Scientific Park of Barcelona (PCB), Barcelona, Spain.
(<http://www.pcb.ub.es/aqr>)

Research Interests

Operations Research: Spatially constrained clustering. Network-based industry clusters identification. Location modeling.

Spatial Analysis: Methods for spatio-temporal data analysis. Methods for the minimization of aggregation bias (ecological fallacy, modifiable areal unit problem). Open source software for spatial analysis.

Micro and Macro Econometrics: Multivariate analysis, Prediction models.

Bibliometrics in regional science.

Editorial Appointments

2009- Editorial board member, *International Regional Science Review*.

Fellowships and Honors

2005 Premio extraordinario de doctorado 2003-2004 (Best dissertation award 2003-2004). University of Barcelona, Barcelona, Spain.

2001-04 Beca predoctoral per a la formació de personal investigador (research fellowship). Generalitat de Catalunya, Ph.D. Program, Barcelona, Spain.

2000 Beca de formació en la recerca i la docència (research fellowship). University of Barcelona, Ph.D. Program, Barcelona, Spain.

1999-00 Teaching Assistant Fellow. Pompeu Fabra University, MSc. Program, Barcelona, Spain.

Committee Member

Scientific Committee:

2008-09 First Conference of the Regional Science Association of the Americas: RSAmericas. 12-13 February 2009 Cartagena (Colombia).

2008-09 III World Conference of the Spatial Econometrics Association. 8-10 July 2009 Barcelona (Spain).

Technical Committee:

2010 XV Annual Meeting of the Latin American and Caribbean Economic Association. 11-13 November 2010 Medellín (Colombia)

Professional Services

- 2009 Contractor. Formulation of an optimization model to reproduce the conditions of the sealed auction by the Guatemala's National Electric Energy Commission (CNEE). Funded by Deloitte & Touche.
- 2007 Contractor. Support San Diego East County Economic Development Council's work for the U.S. Defense Logistic Agency project research and Development for industrial capabilities in logistics, maintenance and manufacturing technologies. Funded by San Diego East County Economic Development Council.

2006-2008 Consultant. Intra-Urban Health Assessed by Remote Sensing and GIS. Funded by the U.S. National Institute of Child Health and Human Development. Principal Investigator: John R. Weeks.

Software Development

2009- **ClusterPy: Software for analytically defining regions based your key variables.**

Developers:

Juan C. Duque and RiSE-group.

Description: Analytical regionalization is a scientific way to decide how to group of a large number of geographic areas or points into a smaller number of regions based on similiarities in one or more variables (ie. income, ethnicity, or environmental condition) that the researcher believes are important for the topic at hand. Conventional conceptions of how areas should be grouped into regions may either not be relevant to the the information one is trying to illustrate (ie. using political regions to map air pollution) or may actually be designed in ways to bias aggregated results.

2007- **PLS-Py SAIA: PLS-Py System for dropout intentions analysis.**

Developers: Juan C. Duque and Lola C. Duque.

Description: PLS-Py SAIA is a software under development which is intended to provide a complete analysis to support decision makers in the formulation of policies to reduce dropout intentions in Spanish universities. This proyect is founded by the Ministry of Education and Culture of Spain.

2005- **STARS: Space-Time Analysis of Regional Systems.**

Developers: Regional Analysis Laboratory (REGAL)

Description: STARS is an open source package designed for the analysis of areal data measured over time. STARS brings together a number of recently developed methods of space-time analysis into a user-friendly graphical environment offering an array of dynamically linked graphical views. It is intended to be used as an exploratory data analysis tool. STARS can also be used from the command line to support more flexible and specialized types of analyses by advanced users. Written entirely in Python, STARS is crossplatform and easy to install (and expand).

2006- **INCLUSIO: Industry Clusters based on Input Output tables.**

Developers: Sergio J. Rey, Juan C. Duque, Charles Schmidt and Xuening Li

Description: INCLUSIO is an open source software that includes new methods to identify industrial clusters within a regional economy and integrates those methods together with spatial analysis techniques and interactive web based visualisation. This work is collaborative with the East County Economic Development Council who have developed the Connectory.

Computing Skills

Languages: Python, GAUSS, R.

Optimization: CPLEX, Lingo.

Statistical: EViews, SPSS, Minitab, Stata.

Application: L^AT_EX, Gvim, Microsoft Office, ArcGIS, Geoda, SpaceStat, Stars.

Operating Systems: UNIX, Windows.

Others: FreeMind, Graphviz, Concurrent Versions System (CVS).
